SUMMARY

Passionate Frontend Developer with experience in JavaScript, React.js, Context API, Redux, JSX, and Tailwind CSS. Committed to solving real-world problems through web development and API integration. Currently enhancing skills through a Full Stack Web Development course by CodeWithHarry on YouTube and a Communication Skills course by TJ Walker on Udemy. Open to collaborative environments and eager to contribute within team settings.

SKILLS

Intermediate: JavaScript, React.js, Context API, Tailwind CSS, HTML, Redux
Beginner: EJS, Vite, Node.js, Express.js, REST API Integration, MongoDB, GitHub

EDUCATION

Bachelor of Computer Applications (BCA)   *2023 - 2026*
G H Raisoni University, Amravati, **8 CGPA**

PROJECTS

iTask Web Application Using React   🔗 [iTask](#)   *May 2025 - June 2025*
Technologies: React.js, Tailwind CSS
- Built a task-tracking web application using React.js with core functionality to add, edit, mark as completed, and delete tasks.
- Developed the project using JavaScript, React, Context API, and Tailwind CSS to build a responsive and dynamic user interface.
- Implemented React Router for seamless page navigation.
- Utilized Tailwind CSS to design a clean, intuitive interface with full responsiveness across mobile and desktop screen sizes for enhanced user accessibility.

Email Viewing Web App   🔗 [Email Preview Web App](#)   *Mar 2025 - Apr 2025*
Technologies: Gmail API, Express.js, EJS, Tailwind CSS
- Built an email viewer integrating Gmail API to fetch Data.
- Implemented RESTful architecture with Express.js and EJS for server-side rendering and dynamic email previews.
- Built the project using JavaScript, Gmail API, Express.js, Node.js, HTML5 & CSS3, EJS, and Tailwind CSS to deliver a full-stack web application with dynamic email integration and responsive UI.
- Designed UI using Tailwind CSS with features like number of emails, sender detail, User Email and smooth scrolling.
- Enhanced performance with Promise.all() for efficient batch fetching and seamless client-server communication.

Spotify Clone   🔗 [Spotify clone](#)   *May 2025 - May 2025*
Technologies: JavaScript, HTML, CSS
- Developed a Spotify-inspired UI with custom features and responsive layout.
- Implemented features like song playback, navigation, seek bar, volume control, and interactive elements.
- Developed the project using JavaScript and HTML5 & CSS3 to create a responsive and interactive user interface.

X.com Clone   🔗 [X.com](#)   *May 2025 - May 2025*
Technologies: Tailwind CSS
- Developed X.com clone using Tailwind CSS, focusing on layout, UI consistency, and clean code.
- Built the project using JavaScript, Tailwind CSS, and HTML to ensure a responsive and visually consistent user experience.
